HARRIET R. HOBBS.

DEPARTMENT OF LABOR,
BYRON B. GRAY.

Physician,
HIRAM K. JONES, M. D.

REPORT OF THE TRUSTEES.

Hon. Shelby M. Cullom, *Governor of Illinois:*

Sir:—The trustees of the Illinois Institution for the Education of the Blind respectfully submit their report for the two years ending September 30, 1880.

The institution has been run to its full capacity, and with gratifying success. The attendance has been larger than ever before. As the people become more acquainted with this institution, the number of applications for admittance increases, and its influence consequently is enlarged. There have been no deaths during the school terms, and but two pupils have died during the vacations.

We have given careful attention to the management of the institution, and find each department in good running order, and its finances faithfully and carefully administered. The last legislature reduced the appropriation for ordinary expenses, so that we might use up a balance on hand, which we think will be done the ensuing year.

The appropriation for boiler fronts, and resetting boilers, has given us excellent fronts, and the boilers are reset in a manner which gives great satisfaction, being placed on rollers and set a greater distance from the grate-bars. This latter increases the heating capacity of the furnaces, lessens the danger of burning the boilers, and decreases the quantity of fuel required to produce a given amount of steam.

The appropriation for kitchen and dining-room enabled us to build a kitchen and furnish it in good style for work, and to obtain a new dining-room by throwing the assembly-room and two school-rooms into one, giving us a room which will seat one hundred and fifty pupils at table with comfort.

We have succeeded in fitting up a room for drying washed clothes, which does its work well, and makes us independent of weather, but we need laundry machinery very much; this we should have, as a measure of economy and convenience. For this we will ask an appropriation, as will be seen in the proper place in our report.

The former dining-room was converted into two school-rooms. One of them is too small for such use, and will be vacated when a suitable room can be procured.

The following changes have occurred among those employed in the institution: Miss F. McGinnis, teacher of the junior department, has been succeeded by Miss Harriet Reed. Professor A. E.

Wimmerstedt, who was in charge of the musical department, has been succeeded by Professor H. Bretherick. Miss E. M. Martin, assistant matron, has been succeeded by Miss Caroline Rutledge, and she by Miss Ellen Woods.

We said, in our previous report, and realize the truth of what we said then more forcibly now, after the passage of these two years, that the school and those in charge of it are suffering inconvenience from the lack of room. Having the centre and the west wing, we do not have a perfect and commodious building, nor can we remedy the inconveniences resulting therefrom without an increase of room. The sitting-room for our male pupils is entirely too small, being sixteen by twenty-one feet in size. Most of the pupils are compelled to resort to a large room in the shop, and not feeling the restraint of the house, give way to rudeness and disorder, which we deprecate, but cannot prevent, as we now are. It is not possible for the studious to study in the midst of the racket they find there. This is a feature of home life which we cannot supply, with our present accommodations.

We need additional music-rooms. Three organs are now in the main hall, so that pupils can use them for practice, having no other place for them where they can be used.

We do not know the number of blind between the ages of ten and twenty-one years to be found in the State, not having the returns from the last census. If the census of 1870 gave us about two hundred and sixty, we may expect that of 1880 to give us about two hundred and seventy. When we add to this the male blind over twenty-one years, who may become pupils in the mechanical department of the institution, we think we are justified in placing the number of possible blind beneficiaries of the State at three hundred. At least two-thirds of these can be relied upon to attend the institution. Then we will need accommodations for two hundred inmates, which is eighty more than we now have room for.

We need a new building for our shops. The size of our present shop limits us to one branch of mechanics, while others might be taught with profit, if we had room. The mechanical pursuits open to the blind, and in which they can engage successfully, are few, and it seems hard that they should be deprived of the majority of these, because we have not space in which to teach them. In addition to increased shop room, we very much need store room for storing broom material and manufactured brooms. The room we have is insufficient and inconvenient for storage, but we cannot do better until we build. A building for shops on the plan proposed will give all the room we require.

We need a new barn. The present one is old, is too small for our use, is inconvenient in its arrangements, is unsightly in its appearance, and is in dangerous proximity to the boiler-house. To remove, remodel and repair it would cost about as much as to build the same barn entirely new, especially as the roof is about gone, and is only made to answer its purpose by letting it severely alone. What we want is a brick barn, which will hold our stock and vehicles and feed sufficient for the winter consumption of the stock, and which will be secure.

We have no coal-house, properly speaking. The one we use is the south end of the barn, and was formerly the carriage-house. This is poorly adapted for the purpose, cannot be made more convenient than it is, and is entirely too small for our needs. Owing to its small size, we would be left at the mercy of any coal strike which should last a week or ten days. We need such a house for coal as will be convenient for use, and large enough to furnish a supply of coal sufficient to make us independent of mud or strikes.

The amount of appropriations for which we expect to ask the next legislature, is as follows:

For construction of a new wing	$30,600
For pavements	480
For sewer (1,500 feet)	775
For new boiler	1,725
For coal-house	1,390
For barn	4,500
For work-shops	8,000
For engine and laundry machinery	1,440
Total	$48.910

For ordinary expenses, we will ask $25,500 for each of the ensuing two years. This figure is based on the expenses of the two years just closed. The average expenses, including contingent, have been $26,760 56 per year. We think we can run the institution for the amount asked.

We will want $1,500 per year for improvements and repairs, and $300 per year for the gratuitous distribution of school and mechanical apparatus.

If the wing is built, we will want $6,500 for the second year, to take care of the increased number of pupils we will receive into the institution; and will also want $2,500 for furnishing it with school apparatus, musical instruments and furniture.

In the confident hope that you will recommend what may be thought to be necessary for the welfare of the blind, we respectfully submit to you the sixteenth biennial report of the Illinois Institution for the Blind.

A. C. WADSWORTH, *President*,
ALBERT G. BURR,
N. W. BRANSON,
} *Trustees.*

JACKSONVILLE, Illinois, *October* 1, 1880.

REPORT OF THE SUPERINTENDENT.

To the Board of Trustees:

GENTLEMEN—The term of 1879 opened, October 2, 1878, with eighty-two pupils in attendance, and closed June 3, 1879. The number on the roll for the year was one hundred and thirty-three; being eighty-six males and forty-seven females.

The term of 1880 commenced October 1, 1879, and ended June 1, 1880. The number on the roll for the year was one hnndred and forty-two; being eighty-nine males and fifty-three females.

The term of 1881 began, September 29, with an attendance of thirty-eight males and thirty females: in all, sixty-eight.

The health of the pupils has been generally good; last year we had thirty cases of measles, but all progressed to a favorable termination. Two of our pupils, Henry J. Howe, of Macoupin county, a very bright boy, died at home, during the vacation in 1879, and Melvin S. Butler, of Vermilion county, a most promising young man, died at home, July 29, 1880.

The progress of the pupils in their studies has been such as to meet the hopes of the most sanguine friends of the education of the blind. Our course of study begins with the alphabet, and reaches the higher mathematics, and in the various branches taught, and in music, the proficiency of the pupils cannot be too highly commended. Our orchestra, composed of twenty-five pupils, has never been in such perfect working order as during the past year.

The graduates of 1879 were: Amelia A. Lorain, of Jersey county; Mary J. Kelley, of Massac county; H. L. Eggerman, of Washington county, and Carlisle Henry, of Peoria county. Those of 1880 were, Caroline Crouse, of Christian county; Margaret E. Fitzgerald, of Alexander county; Anna M. Johnson, of Rock Island county; Jacob Egler, of Lee county; Michael Fahey, of Tazewell county; James E. Reynolds, of Adams county, and Henry J. Tosh, of Macoupin county.

The shop-hands who received certificates of proficiency in the trades taught were: Wm. Bowen and Gustav Blessin, of St. Clair; Finis Tecker, of Lake; James McNeill, of Tazewell; Edward Lott, of Ford; Kennedy Hunter, W. H. Smith, Patrick Crelly and J. R. Hull, of Cook; Henry McClelland, of Greene; Harmon Wait, of Will, and Levi Heikes, of Fulton counties.

Books to the amount of four hundred and sixty-one dollars and five cents have been distributed, as follows: To Louisa J. Taylor, of Henry; Mary J. Kelly, of Massac; Amelia A. Lorain, of Jersey;

Mary C. Ruhl, of Champaign; Lucy R. Lee, of Carroll; Emma Searle, of Fulton; Abigail Sparks, of Fayette; Frank Stevens and Harrison Fielding, of Pike; Clara B. Aldrich, of Will; Anna M. Johnson, of Rock Island; Ella Fitzgerald, of Alexander; Michael Fahey, of Tazewell; Edgar Reynolds, of Adams; Jacob Egler, of Dixon; Laura Rubert, of Warren, and Solomon Griswold, of Edwards counties.

Broom tools, in entire sets or parts of sets, have been distributed to the amount of two hundred and forty-five dollars and eighty cents, as follows: To A. McCallum, of Boone; J. C. Nash, of Champaign; Kennedy Hunter and Patrick Crelly, of Cook; Harmon Wait, of Will, and Jefferson Tosh, of Macoupin counties.

The authorities of St. Clair county bought two sets of broom tools, and those of Ford county one set, for shop-hands from their respective counties, to set them up in business, an example worthy of imitation by other county boards.

Some changes have occurred among the teachers employed in the institution. Prof. A. E. Wimmerstedt, who had been connected with the musical department for fourteen years, and Miss Frances McGinnis, who had been a teacher in the institution for twelve years, resigned their positions. They were faithful and devoted workers, competent and successful teachers; they were given up with general regret, and took with them our good wishes.

The expenses, per capita, are in inverse proportion to the average attendance of the inmates, the smaller number giving the greater, and the larger number the less per capita. The number of our inmates being small, the cost, per capita, is larger, as compared with other institutions whose attendance exceeds ours. If our average attendance were increased fifty persons, or sixty-five per cent., the cost per capita would be decreased about sixty-one dollars, or eighteen per cent.

The prices paid for articles furnished will be affected (1) by the quality of the goods; (2) by the quantity purchased; (3) by the time of purchase. The articles we purchase are invariably good; the quantity, limited by the size of the school, is comparatively small. We have not heretofore had a store-room, and were often compelled to buy on an unfavorable market. This difficulty has been partially obviated, and our expenses were less last year than the preceding one.

The amount of food consumed in an institution is affected (1) by the appetites of the consumers; (2) by the quality of food; (3) by the manner of preparing the food for the table; (4) by the waste in the cooking. Our pupils furnish the appetites; the food furnished is of good quality, and is well cooked; our waste in the kitchen is only what occurs in the cooking.

The amount consumed, of certain articles, may be increased by their purchase for special occasions; or the amount of purchase decreased by their production and consumption on the premises. We do not raise articles of food for the inmates, and must purchase everything we use.

The cost of maintaining an institution for the blind is increased by their helplessness. We cannot get along as we should without a full complement of well-trained help. We cannot economize or

reduce expenses by employing the blind in necessary in-door or out-door work. Others must do that, and be paid for it. Hence the item of wages will be correspondingly large in such institutions, and the per capita expense increased.

As said in my report of two years ago, I wish to repeat in this: There are some things of which I wish to speak, and which you, perhaps, can only reach through the parents of the children. One is the use of tobacco by the pupils. I endeavor to prevent the formation of the habit while at the institution, but fail from lack of coöperation on the part of the parents. They, not thinking of the physical condition of the blind child, will permit, and in some instances encourage, the formation of the habit. The nervous system of nearly all the blind who come to the institution is in a debilitated or disordered condition. This may be the result, or accompaniment, rather, of congenital blindness, or of imperfect physical development, or be an effect of the disease producing blindness. Whatever the cause, many of them are what is popularly called nervous. To add the effects of tobacco to this low grade of nervous vitality, is to inflict a serious injury upon the blind. The sympathy of parents in permitting their boys to form the habit, so far from being a kindness, is a positive harm, which all the care and attention we can give them will not eradicate. I ask the coöperation of the parents in preventing the formation of the tobacco habit by their blind children.

Another is the helpless condition in which pupils are sometimes brought here. This is not chargeable to any real defect in the child, but to over-fondness and over-kindess of those who have them in charge. It is no kindness to a child to so wait upon it that when committed to our care it can neither dress nor undress itself, cannot wash its own face, nor comb its hair; pupils should be taught these things before they are brought here, and if they cannot learn, there is reason to fear they cannot learn other things when placed in our care. To be able to do these things of themselves gives even the youngest of our pupils a perceptible feeling of independence, which enables them to start readily in their studies. This self-help is educational, and should be begun at home.

I desire to return you my sincere thanks for your ready support and cordial coöperation in all measures undertaken for the welfare of the institution; and, grateful for the prosperity of the past two years, through the liberality of the last General Assembly, I respectfully submit this report.

F. W. PHILLIPS,
Superintendent.

Jacksonville, Illinois. *September* 30, 1880.

ACKNOWLEDGMENTS.

We desire to thank the publishers of the following papers, weeklies and monthlies, for their papers sent us during the two years past:

St. Louis Republican,
Clark County Herald,
Illinois Courier,
Jacksonville Journal,
Good Health.
The Goodson Gazette,
Mutes' Companion,
The Philomathean Argus,
The Mistletoe,

Thanks are also due to Hons. C. M. Morse and M. T. Bates, of the Chicago and Alton railway, for favors to pupils and officers.

NOTICE TO APPLICANTS.

The school year commences on the first Wednesday in October, and closes on the first Tuesday in June, of each year. It is very important that every pupil be on hand the day school begins, and remain until it closes.

As a rule, none are admitted under ten nor over twenty-one years of age, but the trustees have discretion in all cases. The shop is open to all who can learn a trade.

No person incapable of receiving instruction, from physical infirmity or imbecility, or of unsound mind, or of confirmed immoral habits, will be knowingly received or retained in the institution.

Scholars, residents of Illinois, will be provided with boarding, washing, etc., at the expense of the state. Their friends will be required to supply them with comfortable clothing, and be at the expense of their traveling to and from the institution.

Two full suits of clothing should be sent with each pupil, and every piece marked with his or her name.

No person should be brought to the institution as a pupil until a letter of admission has been received from the superintendent, to whom all letters for information should be addressed, at Jacksonville, Illinois.
